

# Asher Fried - Full Stack Developer

Jerusalem | 051-545-0252 | [friedash85@gmail.com](mailto:friedash85@gmail.com)  
[Github](#) | [LinkedIn](#) | [Portfolio](#)

## SUMMARY

---

Full Stack Developer, with four years of hands on coding as a passionate hobbyist. Possesses strong problem solving skills and excellent communication abilities, with a talent for explaining complex technical concepts clearly

## TECHNICAL SKILLS

---

Python | Javascript | React | SQL | TypeScript | Redux | HTML | CSS

## TECHNICAL PROJECTS

---

### Fallen Soldier Memorial Website - [Github](#) | [Demo](#)

A project where users can commit to do a good deed in memory of a soldier who has fallen in the Iron Swords War.

- Used an Express server for the backend for a quick asynchronous server.
- Used React with Typescript for the frontend, for quick renders.
- Used mailersend to send confirmation email for those that opted in.

### Movie Recommendation Console App- [Github](#)

A Python console based program that takes a list of movies as input and uses the data from the movies to recommend similar movies.

- Used a Postgres database to store the movies that were inputted.
- Used the TMDB api to fetch movie details.
- Used the OpenAI api to recommend similar movies.

### PowerWash Booking Website - [Github](#)

A website for booking a slot for a power wash.

- Used an Express server to accept and process booking details.
- Used React for the frontend, and used react-calendar component for the bookings.
